### Introduction

The entry of date and time information is a fundamental function within clinical and administrative processes. Therefore, healthcare professionals should have a clear mechanism for entry of an accurate date or time value, and be assisted to disambiguate entries when necessary.

---

#### Important

Although it contains all of the guidance points, this document omits supporting information and is therefore not intended as a substitute for the full NHS CUI document *Date and Time Input*<sup>1</sup>. Refer to that document for the definitive statement of the design guidance in this area.

The visual representations used to display the guidance are illustrative only. Stylistic choices (for example, display font used), unless otherwise specified, are not part of the guidance and are therefore not mandatory requirements.

---

<sup>1</sup> Design Guide Entry – Date and Time Input (v3.0.0.0)

### Date Input

The basic date input control should comprise:

- A free text input area
- A calendar control
- A default input, dependent on the context in which the control is used
- A facility to disambiguate the date entered

*Above Elements of a basic date input control*

Though labels are not covered in this guidance, the control should have a short and descriptive label wherever it is used, for example 'Date of Birth'.

Users should be able to input free text dates as fully specified dates, partially specified dates and arithmetic shortcuts.

The entry of partially specified dates will not be appropriate for every situation. Therefore, application designers should decide what types of dates are allowed for a given situation, based on the specific clinical context.

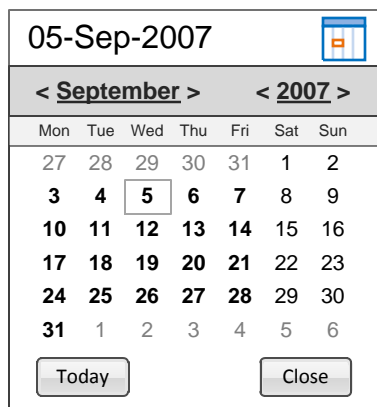

# Date Input

D+Tc-0001

Adopt the NHS Common User Interface standard for *Date Display*<sup>1</sup> for the format of any dates displayed within the date input control

**Mandatory**

Calendar Control

D+Tc-0002

Allow for both free text input of dates and the input of dates using a calendar control

**Mandatory**

D+Tc-0004

Include the calendar icon within the boundary of the date input field

**Mandatory**

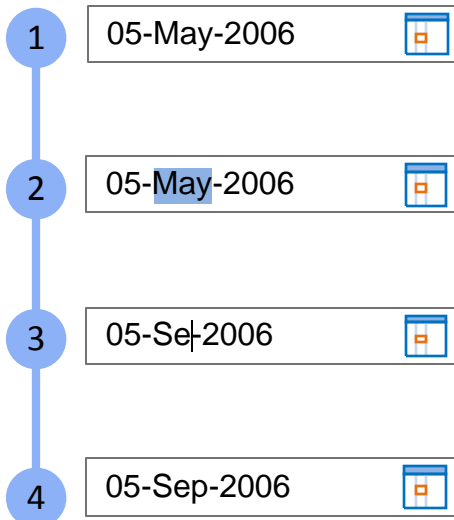

Free Text Input

<sup>1</sup> Design Guide Entry – Date Display (v5.0.0.0)

## Date Input

### Free Text

D+Tc-0003

Allow the date elements to be individually edited (day, month and year)

**Mandatory**

D+Tc-0006

Provide instructions on how to use the control, for example, via the use of tooltips. The instructions must contain details of the different date types that can be entered

**Mandatory**

D+Tc-0008

Allow the input of 'Unknown' (or similar) to specify dates not known to the user

**Mandatory**

## Date Input

### Free Text

D+Tc-0046

Within the date input control, allow users to select the entire value to facilitate rapid editing or entry of arithmetic shortcuts relating to date (only)

**Mandatory**

|   |                   |
|---|-------------------|
| + | For later dates   |
| - | For earlier dates |

|   |       |   |        |
|---|-------|---|--------|
| d | days  | m | months |
| w | weeks | y | years  |

D+Tc-0007

Allow users to enter arithmetic shortcuts, such as '+3m' for three months later or '-2d' for two days earlier. The relevant operators are as illustrated

**Mandatory**

**Note** Whole numbers are treated as positive by default

D+Tc-0041

Within the date input control, do not allow users to input arithmetic shortcuts relating to time

**Mandatory**

### Date Input

#### Free Text

D+Tc-0009

Display a default input within the free text date input control

*Mandatory*

D+Tc-0042

When displaying a default input within the free text input box, provide the user with an example of date with either a non-specific value (such as the input mask) or a date appropriate to the clinical context (for example, 'today's date')

*Recommended*

# Date Input

## Calendar

D+Tc-0010

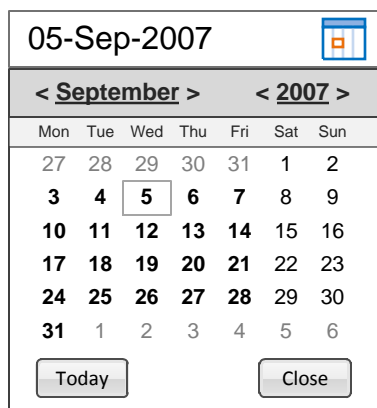

Provide access to the calendar control via a calendar icon

Mandatory

D+Tc-0017

Allow the calendar to be closed either when the user clicks away from the calendar or clicks on the calendar icon

Mandatory

D+Tc-0011

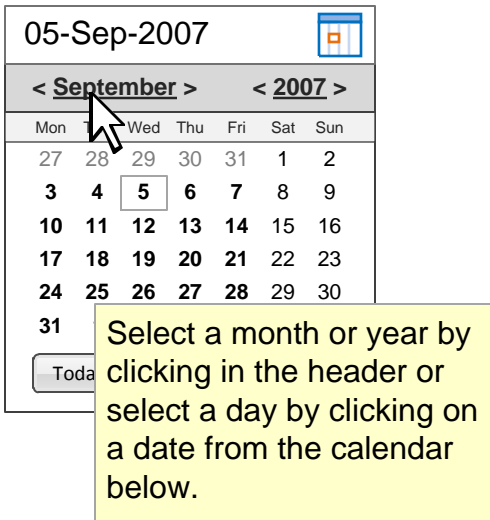

Provide the ability to select a month independently, and a year independently. Signify the interactivity of these elements by suitable styling, for example as buttons or links, and ensure that they have descriptive tooltips

Mandatory

**Note** A partially specified date can be entered using the calendar control by clicking either the month or the year

## Date Input

### Calendar

05-Sep-2007

< September > < 2007 >

| Mon | Tue | Wed | Thu | Fri | Sat | Sun |
|-----|-----|-----|-----|-----|-----|-----|
| 27  | 28  | 29  | 30  | 31  | 1   | 2   |
| 3   | 4   | 5   | 6   | 7   | 8   | 9   |
| 10  | 11  | 12  | 13  | 14  | 15  | 16  |
| 17  | 18  | 19  | 20  | 21  | 22  | 23  |
| 24  | 25  | 26  | 27  | 28  | 29  | 30  |
| 31  |     |     |     |     |     |     |

Today

Select a month or year by clicking in the header or select a day by clicking on a date from the calendar below.

D+Tc-0016

Provide access to relevant instructional text (for example, via tooltips) on the clickable elements in the calendar header

**Mandatory**

30-Sep-2007

< September > < 2007 >

| Mon | Tue | Wed | Thu | Fri | Sat | Sun |
|-----|-----|-----|-----|-----|-----|-----|
| 27  | 28  | 29  | 30  | 31  | 1   | 2   |
| 3   | 4   | 5   | 6   | 7   | 8   | 9   |
| 10  | 11  | 12  | 13  | 14  | 15  | 16  |
| 17  | 18  | 19  | 20  | 21  | 22  | 23  |
| 24  | 25  | 26  | 27  | 28  | 29  | 30  |
| 31  | 1   | 2   | 3   | 4   | 5   | 6   |

Today Close

D+Tc-0015

Include the days of the week within the calendar view

**Mandatory**

D+Tc-0014

Provide a visual indication of the current date

**Mandatory**

D+Tc-0013

Provide a link or button to close the control

**Mandatory**

D+Tc-0012

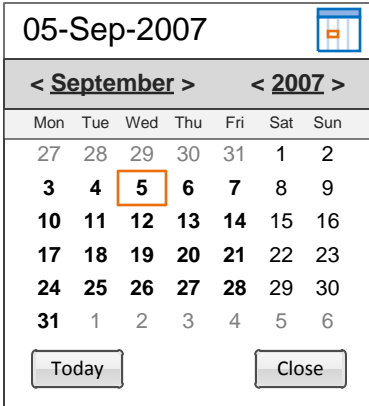

Provide a button to allow the user to enter today's date

**Mandatory**

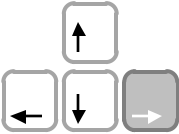

# Date Input

## Calendar

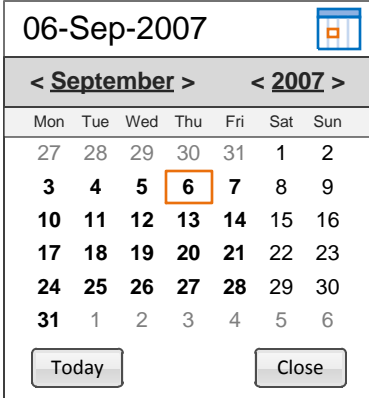

1

2

3

D+Tc-0019

Ensure that the control can be operated effectively via the keyboard (for example, using arrow keys)

**Mandatory**

D+Tc-0018

Display the appropriate value in the free text field following selection of the date

**Mandatory**

## Date Input

### Disambiguation

D+Tc-0005

Provide disambiguation of any free text date input

**Mandatory**

Did you mean:

[05-Apr-2009](#) or [04-May-2009](#) or [different date?](#)

D+Tc-0038

Provide the facility for a user to disambiguate a date entered via the date control

**Mandatory**

D+Tc-0039

Display a message dialog box with appropriate instructional text if the data is ambiguous or incomplete

**Mandatory**

D+Tc-0040

Display a maximum of two suggestions based on the data entered, plus an option to re-enter the value in the input field. Selection of a suggested value enters that value into the control

**Recommended**

## Time Input

The time input control should comprise:

- An input area
- A default input, dependent on the context in which the control is used
- A spin control
- A tick box to indicate if the time is approximate (where appropriate)

*Above Elements of a basic time input control*

The option to mark a time as approximate may not be appropriate for all situations, so the feature should be enabled in the control as required by the clinical context.

Though labels are not covered in this guidance, the control should have a short and descriptive label wherever it is used, for example 'Time of Birth'.

Users can enter time in the input control as fully specified times, approximate times and arithmetic shortcuts. In addition, the 'seconds' element of time can be entered if required. The inclusion of seconds is at the discretion of the host ISV application.

## Time Input

D+Tc-0022

Use an 'Approx' check box to allow the user to indicate an approximate time

[Mandatory](#)

---

D+Tc-0020

Adopt the NHS Common User Interface standard for *Time Display*<sup>1</sup> for the format of any times displayed within the time input control

[Mandatory](#)

---

D+Tc-0021

Use the 24-hour clock only (rather than the 12-hour clock)

[Mandatory](#)

D+Tc-0023

Allow the time elements to be individually edited (hours, minutes and seconds)

[Mandatory](#)

---

<sup>1</sup> Design Guide Entry – Time Display (v4.0.0.0)

## Time Input

D+Tc-0047

Within the time input control, allow users to select the entire value to facilitate rapid editing or entry of arithmetic shortcuts relating to time (only)

**Mandatory**

D+Tc-0044

Within the time input control do not allow users to input arithmetic shortcuts relating to date

**Mandatory**

|   |                   |
|---|-------------------|
| + | For later times   |
| - | For earlier times |
| h | hours             |
| m | minutes           |
| s | seconds           |

D+Tc-0025

Allow users to enter arithmetic shortcuts such as '+3h' for three hours later and '-2m' for two minutes earlier. The relevant operators are as illustrated

**Mandatory**

**Note** Whole numbers are treated as positive by default

## Time Input

D+Tc-0024

Provide access to instructions on how to use the control, for example, via the use of tooltips. The instructions must contain details of the different time types that can be entered

**Mandatory**

D+Tc-0043

Provide indication to the user that the 24-hour clock is in use

**Mandatory**

D+Tc-0026

Allow the entry of 'Unknown' (or similar) to specify times not known to the user

**Mandatory**

D+Tc-0027

Display a default input within the time input control

**Mandatory**

**Above A default time**

**Above A default time with a non-specific value**

D+Tc-0045

When displaying a default input within the free text input box, provide the user with an example of time with either a non-specific value (such as the input mask) or a time appropriate to the clinical context

**Recommended**

## Time Input

D+Tc-0028

Increase/decrease the whole time by the least significant time unit if the entire value is selected or if no unit is selected

Mandatory

D+Tc-0029

Provide the ability to spin individual time units when selected

Mandatory

## Duration Input

Duration

D+Tc-0030

Adopt the NHS Common User Interface standard for *Time Display*<sup>1</sup> for the format of any times displayed within the duration input control

Mandatory

---

Duration

D+Tc-0031

Provide access to instructions on how to use the control, for example, via the use of tooltips. The instructions must contain details of the different units that can be entered

Mandatory

Enter a duration using the following units:

- y = year
- m = month
- d = day
- hr = hour
- min = minutes
- sec = seconds

Duration

D+Tc-0032

Allow the entry of time duration units either singly or in combination

Mandatory

Duration

---

<sup>1</sup> Design Guide Entry – Time Display (v4.0.0.0)

## Duration Input

1 Duration

2 Duration

3 Duration

D+Tc-0033

Allow editing of the individual elements of a duration

*Mandatory*

|   |        |     |         |
|---|--------|-----|---------|
| y | years  | hr  | hours   |
| m | months | min | minutes |
| w | weeks  | sec | seconds |
| d | days   |     |         |

D+Tc-0034

Ensure that the illustrated set of duration unit abbreviations is supported

*Mandatory*

Duration

D+Tc-0035

Allow the set of duration unit abbreviations to be extended appropriately, for example, 'hrs' as well as 'hr'. Ensure that any additions are unique within the entire set

*Recommended*

Duration

Duration

D+Tc-0036

Allow the user to optionally enter white space within the duration input, for example '3 hr 5 min' as well as '3hr 5min'

*Recommended*

## Duration Input

Duration

Did you mean:  
[6 months](#) or [6 minutes](#)?

D+Tc-0037

Provide the facility for a user to disambiguate input which could be interpreted in more than one way, for example, 'm' (which could represent months or minutes)'

*Recommended*

---

Start Date  

Start Time

Duration

This duration spans the change from GMT to BST. BST runs from 28-Mar-2010 01:00 to 31-Oct-2010 02:00. During BST, times will be automatically adjusted forward one hour such that 01:00 becomes 02:00.

D+Tc-0048

Where a time duration spans the change between GMT and BST, show a pop-up to inform the user that the system will automatically handle the data within the appropriate time zone

*Recommended*

D+Tc-0049

Where a user adjusts time manually resulting in a time duration spanning a change between GMT and BST, show a pop-up to inform that user that the system will automatically adjust the data according to the appropriate time zone.

*Recommended*

---
